

Math Club 3 Class Information

September 24, 2017

Welcome to Math Club 3 at SchoolNova!

Instructor Information

Vibha Mane

Email: Vibha.Mane@stonybrook.edu

General Information

The Club is intended for children in Grades 5-6. The goal of the club is to kindle enthusiasm in Mathematics for young children, and develop creative problem solving skills. We will participate in the MOEMS Math Olympiad, and study some cool math topics, such as Number Theory, Probability, Game Theory and Spherical Geometry.

Activities

There will be a total of about **25 classes** for the year. The number of classes for each activity is summarized below. A detailed schedule is posted separately.

- Writing the MOEMS Math Olympiad: 5 classes
- Math Olympiad Practice: 8 classes
- In the remaining 12 classes, we will cover three units, as indicated below. There will also be Math Battles and Math Kangaroo practice.
 1. Combinatorial Games
 2. Probability
 3. Spherical Geometry

Fees

The total fees for attending the Club is \$115. Of this \$65 will be collected in October, and another \$50 will be collected in January. This will cover the resources used for the Club, some snacks, registration for the Math Olympiad and an Olympiad T-shirt.

Homework

There will be no regular homework posted. Projects and games will be done in class, and occasionally assigned for homework. Please bring in a notebook to log your work. Math Olympiad practice problems will be handed out in class.

Math Competitions

- We will participate in the MOEMS Math Olympiad, which will be held in-class during the Club. Detailed information on this will be posted separately.
- We will do some practice Math Kangaroo, prior to the competition.

Class Policies

Parents are welcome to attend the class. Please be quiet and take a seat at the back of the class.

Resources

Some of the resources used are listed below:

Math Olympiad Contest Problems for Elementary and Middle School, by Dr. George Lenchner

Mathematicians Are People, Too, Luetta Reimer and Wilbert Reimer

The Story of Mathematics, Anne Rooney

The Colossal Book of Mathematics: Classic Puzzles, Paradoxes and Problems, Martin Gardner
