

TRIANGLES CONGRUENCE RULES

Two objects are **congruent** if they have same shape and size

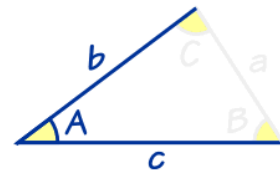

Two triangles are congruent if they have same sides and same angles.

Congruent Triangles Rules : (\cong Congruent symbol)

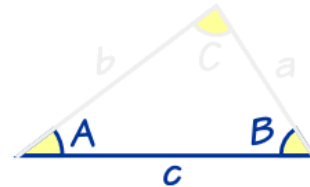

1. 3 Sides are equal (SSS)

2. Side Angle Side are equal (SAS)

3. Angle Side Angle are equal (ASA)

4. Angle Angle Side are equal (AAS)
Same as ASA, why?
