

NAME:

---

1. We don't normally *see* sound, we *hear* it, don't we? 😊

Invented by German physicist Heinrich Rubens in 1905, "Rubens' Tube" is an impressive physical demonstration that helps *visualize* sound waves.

Watch it at <https://www.youtube.com/watch?v=1ZcOusmB4Ls>

2. Answer the question below:

a. What is Rubens' Tube used for?

b. What do you need to make one (don't try this at home)?

c. What parameter of a sound wave is responsible for its pitch?

d. How is that shown in the demonstration?

e. What parameter of a sound wave is responsible for its volume/loudness?

f. How is that shown in the demonstration?
